## The Roaring Twenties

### Job #7

#### Task:

Let's go back in time! Go to this site and type in your birthday but don't use your birth year. Use these years instead of your birth year:

**1920, 1925, 1929**

1. Imagine that you bought a new car each of those years. What is the total amount you paid on automobiles in the 1920's?
2. Your family sent 40 Christmas cards in 1925. How much did your family spend on postage?
3. Ask an adult to type in his or her birthday. Compare the average income in 1925 to the year your adult was born. What is the difference?
4. Let's pretend that the average family buys 5 gallons of milk each week. How much did the family spend each week in 1920, 1925 and 1929? In which year did a week of milk cost the most?
5. Why do you think the price of stamps stayed the same?
